Excerpt: .was necessary to keep it covered when not in use. A portion that was left uncovered for a week became watery. Experiment No. 3.--Mix starch, 2 ounces, and water 16 ounces, and make a paste by heating. When cool add ounce of formaldehyde. This was made on the same day as No. 2 and subject to the same conditions. It is in perfect condition at the present writing. Experiment No. 4.--Mucilage of acacia, U. S. P., was made and 1 per cent of formaldehyde added. This has now been standing for two months in a warm place and shows no signs of fermentation. Experiment No. 5.--Make a thick paste from white dextrin, 4 ounces; and water, as much as required. Then add 8 ounces of flour paste made as in experiment No. 1, and ounce of formaldehyde. This has been setting on the...

Reviews

This kind of publication is every little thing and taught me to looking ahead of time and a lot more. It is packed with wisdom and knowledge Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ida Herman**

This book could be worthy of a read through, and a lot better than other. It can be full of knowledge and wisdom I am just happy to tell you that here is the best book we have read through inside my personal lifestyle and could be he finest pdf for ever.
