Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The CO-OPS Ocean Systems Test and Evaluation Program (OSTEP) facilitates the transition of new technology to an operational status, selecting newly developed sensors or systems from the research and development community and bringing them to a monitoring setting. OSTEP provides quantifiable and defensible justifications for the use of existing sensors and methods for selecting new systems. The program establishes and maintains field reference facilities where, in cooperation with other agencies facing similar challenges, devices are examined in a nonoperational field setting. Through OSTEP testing and data analysis results, sensors performance is evaluated, data sampling and processing methodology are developed, along with quality control procedures, and maintenance routines generated. The quality of the measurement systems used in the field is assured by both rigorous traceable calibrations and redundant sensors.
